

Table A3-1: Teacher–Student Ratio (2023–2026)

Academic Year	Students	Teachers	Ratio
2023	2,589	76	1:34
2024	2,529	69	1:34
2025	2,217	70	1:33
2026	2,818	70	1:40

The table presents the teacher–student ratio at the college from 2023 to 2026.

The data for 2023–2025 represent actual enrollment statistics, while the figures for 2026 are projected based on the current admission plan and expected student intake.

Although the projected ratio in 2026 slightly increases, the college ensures effective supervision through the 100% Dual Vocational Education (DVE) system, where workplace trainers in partner enterprises jointly supervise students together with academic teachers.

Figure A3-1: Trend of Teacher–Student Ratio

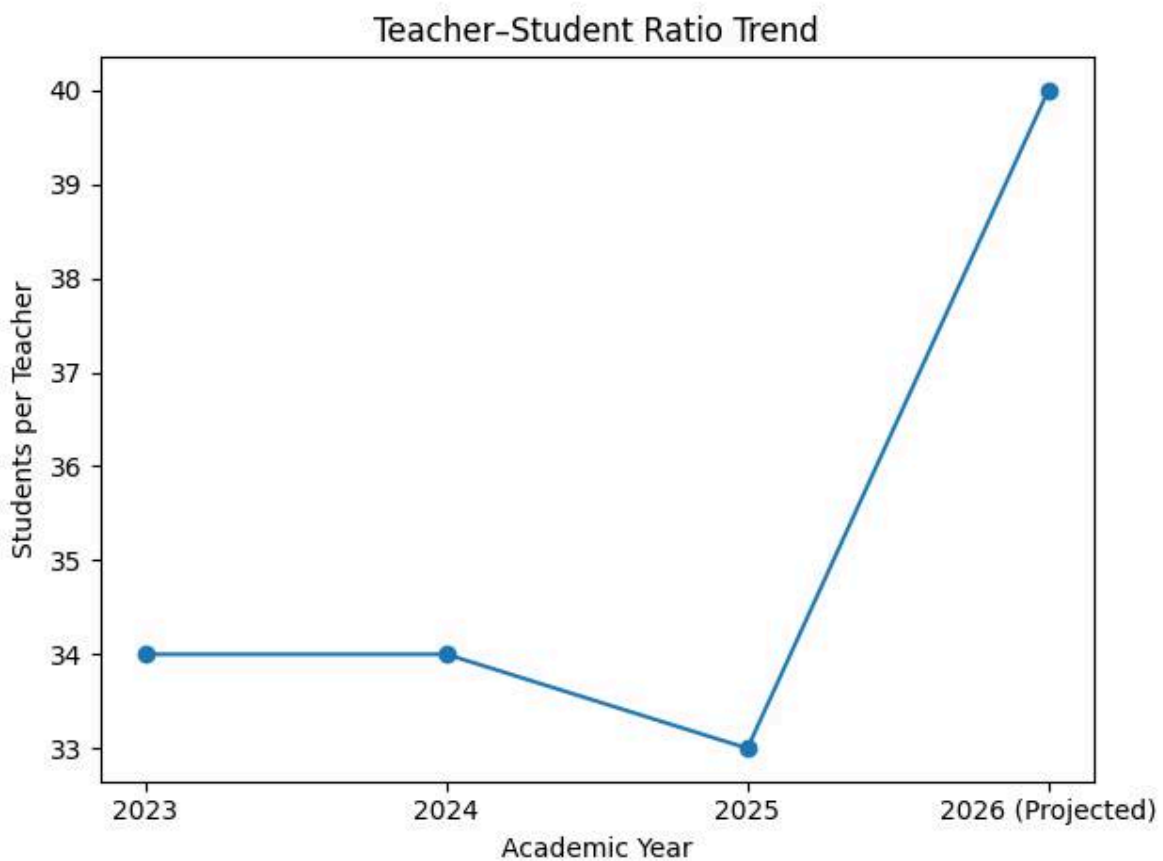

Figure A3-1: Trend of Teacher–Student Ratio (2023–2026)

The chart illustrates the trend of the teacher–student ratio at the college. Although student numbers have gradually increased, the institution maintains effective supervision through the Dual Vocational Education (DVE) system and strong collaboration with industry trainers.

Table A3-2: Dual Vocational Education Supervision Structure

Supervision Type	Responsible Person
Academic supervision	College teachers
Workplace supervision	Industry trainers
Monitoring and evaluation	Joint supervision between teachers and enterprises

The college regularly monitors the teacher–student ratio to ensure adequate academic supervision and effective learning support.

The institution operates under a **100% Dual Vocational Education (DVE) system**, where students spend a significant portion of their studies in partner enterprises. During this period, students are supervised by both academic teachers and qualified workplace trainers.

This collaborative supervision model supports effective learning and reduces the direct classroom supervision load on college teachers.
